GENERAL DESCRIPTION OF THE PROJECT AND BACKGROUND ON USER(S) OF THE FACILITY
(Attached additional sheets as necessary)

Unither Pharmaceutical is a contract manufacturing organization (CMO) focused on a few premeasured dosage forms that are preferred by patients. In the U.S., these are currently sterile blow-fill-seal (BFS), and Unistick® liquid stick-packs. We help our customers develop products that we manufacture and fill, and we also create pharmaceutical products that our customers can immediately brand, market, and sell. There are great market opportunities for our customers worldwide.

Our mission is to provide innovative, competitive, and sustainable solutions to our customers. We do this by combining extensive expertise in drug delivery technologies and fill-finish operations with our growing understanding of patient needs and experience in product and process development.

We are a global leader in single unit dosage forms, with technologies enabling line extensions and product differentiation that supports lifestyle-related shifts in consumer needs, as well as dosing and compliance challenges in certain patient demographics.

Our products and services create opportunities to develop line extensions and extend product lifecycles. Single unit dosage forms and delivery systems are available for both Rx and OTC products.

Due to our great growth in the North American Markets, we have customer orders that currently exceed 500 million doses to be delivered in the next two years, and we have future business that will grow to over 2 billion doses to be delivered within the next 5 years. This project will deliver over 125,000 sq ft building expansion and retrofit to enable unique single dose pharmaceutical sterile manufacturing capacity growth to achieve over 2 billion single doses delivered to our customers by adding multiple production lines for compounding, filling and packaging. Project scope includes 2 specialized machines per year over a 5 year period with a first stage 22,000 sq ft facility expansion for new packaging line and warehouse to accommodate finished product storage. Project will utilize architects, engineers, surveyors and construction management companies to ensure that building meets all required building and local codes. This project will required the rapid growth and employment of over an additional 125 high skilled manufacturing jobs in the next three years.

See attached project drawings.
