GENERAL DESCRIPTION OF THE PROJECT AND BACKGROUND ON USER(S) OF THE FACILITY  
(Attached additional sheets as necessary)

Five Star Tool Company was established in 1965 as a leading designer and manufacturer of precision cutting tools for the metal cutting industry. We manufacture several types of precision cutting tools comprised of solid carbide, high speed steel, or carbide tipped material. We also manufacture small, intricate parts for industries such as aerospace, medical, dental, firearms, and automotive to name a few. We are ISO 9001:2015 certified.

The current 14,000 sf building is comprised of 5,000 sf of office and 9,000 sf of manufacturing space. The company has expanded production capabilities since purchasing the existing building in 2008. With the addition of machinery and equipment, the company needs floor space to increase efficiencies in order to meet the demands for a higher level of production.

Over the last couple of years, management has been reviewing options to move the company to another building or expand the existing. The expansion was the most feasible for the amount of space needed and the least disruptive to the existing operations. Management negotiated a price for the adjacent lot with the Seller and the purchase took place in September, 2019.

The cost of expansion is estimated at \$1.4M. Due to the high cost, the owners are applying for all assistance applicable in order to reduce the burden of the expansion.

The new construction will consist of 15,000 sf new space with roughly 90% manufacturing and 10% office. The building being purchased is a premanufactured steel building. The building has 20' ceilings and will include a mezzanine area for office, conference room and restrooms. The sitework will include a new asphalt entrance with employee parking and truck delivery area. New utilities will be brought to the building including relocation of gas & electric and new water and sewer service. The Monroe County Water Authority will provide the new water service capable of providing the required water for a sprinkler system.
