II. PROJECT (cont’d)

F. Are other facilities or related companies located within New York State?
   □ Yes □ No
   Location:
   No, but we do plan to operate a few solar projects in NYS with seven projects in various stages of planning and development.

Will the Project result in the removal of an industrial or manufacturing plant of the Project occupant from one area of the state to another area of the state? □ Yes □ No

Will the Project result in the abandonment of one or more plants or facilities of the Project occupant located within the state?
   □ Yes □ No

If Yes to either question, explain how the Agency’s Financial Assistance is required to prevent the Project from relocating out of the State, or is reasonably necessary to preserve the Applicant or User’s competitive position in its respective industry:

G. Would the project be undertaken without financial assistance from the Agency?
   □ Yes □ No

Please explain why financial assistance is necessary.

This project is part of a strategic portfolio and will look to proceed.

However, solar projects are extremely challenging to develop in the State of New York, and falling internal rates of return have caused many projects in the development cycle to become infeasible. With recent solar supply chain challenges and overall increased project costs, any financial assistance helps to improve overall project economics. It is becoming a major challenge for all solar project owners. A requirement to pay Sales and Mortgage Recording Tax will drive up project operating expenses this will reduce the overall returns further thereby significantly affecting project viability.

The proposed solar project is making a financial commitment to the community by investing in the local electrical infrastructure, offering subscribers utility bill credits out of the project revenues, and helping spur the local economy by increasing employment opportunities and project related commerce.

In addition, there is an interest in starting construction on this project sooner rather than later, which will directly translate to economic spin-off benefits to both the Town of Sweden and Monroe County overall.
