GENERAL DESCRIPTION OF THE PROJECT AND BACKGROUND ON USER(S) OF THE FACILITY
(Attached additional sheets as necessary)

Nexamp is proposing to develop a 5 MW (AC) ground mounted solar energy project (the Facility) on privately-owned property which is currently being utilized for agricultural purposes. The total facility's footprint will encompass ±26.0-acres of farmland located on a ±169-acre parcel. Mendon Renewables, LLC will lease the property from the landowner over an initial term of 20 years, with two, ten year options to extend.

This project will operate as a Community Distributed Generation (CDG) project under the NY Sun program. CDG projects provide a significant benefit to the local community, by enabling residents in the area to participate in a share of a local clean energy project and receive a discount on their electricity bills. Nexamp's program, Solarize My Bill, offers a 10% discount to any interested National Grid customer. There are no long term contracts, no credit checks, and no sign-up fees associated with the program. This project is expected to provide discounted credits to approximately 370 households, equal to an estimated savings of over 40,000 annually.

Founded in 2007 by two U.S Army veterans, Nexamp is now a national leader in community solar development, with projects in over 165 locations, totaling almost 400 MWs in capacity installed or under construction. In NY alone, Nexamp now has over a dozen projects in operation, totaling over 30 MW of capacity.

Our vertically integrated model is a strength and differentiator for Nexamp. We own and operate all of our solar projects and manage every stage of the process: financing, project development and acquisition, design, construction, operations and maintenance, and energy sales.

In addition to the energy savings provided to the local community, the other benefits of this project are summarized below:

- Significant increase in tax revenue to the county, town and school district
- An estimated 26 construction workers over the 8 month construction schedule. We will work to hire locally to the greatest extent possible. This includes local landscapers, electricians, and site civil contractors.
- Over \$2,000,000 spent on local goods and labor (electricians, fencing, site work, etc.)
- Operations and Maintenance work (20 year contracts). This generally consists of hiring local contractors to perform snow removal, landscaping, and electrical maintenance.
